

SAT Math Camp

Dr. Zhenyi Liu

zhenyimcnultyliu@gmail.com

- * Ph.D in mathematics, specialized in geometric topology
- * More than 12 years of teaching math experience at all school levels
- * More than 5 years of university teaching experience
- * 6 years of teaching experience at Ray Chinese School

Course Description:

This course will cover the important fundamental concepts, formulas and theorems listed in the study guide of the College Board, the official SAT organization. Topics include linear, quadratic, exponential functions and their graphs, Vietas Formula, the Remainder theorem, the Factor theorem, complex numbers, prisms and circles, trigonometry, probability, statistics and more. Students in this class will practice a large number of SAT exam questions which will hone their skills and prepare them for high achievement on this test.

Class Schedule:

June 6- July 10, 2022

Tuesday and Thursday @9:45-11:30am Total: 20 hours
